ATTESTATION OF VALIDITY OF THE PRODUCT PHYTOTHERAPY BIORIGENERA

Antropos Institute SA Lugano, attests to have followed the care of bedsores of some patients afflicted from diabetes that, duly informed, they have used the product with vegetable stem cells of gardenia.

As you can deduce by the photos here attach, we have been able to ascertain the amazing curative qualities of the product.

This product applied in the daily medications in the serious decubitus sacred affections from ulcerous lesions necrotic and degenerative, it has shown to possess a strong cicatrizant property that stimulates furthermore the tissue cell regeneration, bringing a swift recovery of the wounds and a drastic reduction of the times of recovery, reducing so the time of hospitalization of the patient.

To testimony than above, we attach a photographic documentation that puts in evidence the curative validity of the product phytotherapy Biorigenera used on patient affected by ulcerous sore.
